

# Matsutek S70W0B introduction

You can trust it !

# Self-learning robot

First time clean

MAP editor

The second time clean

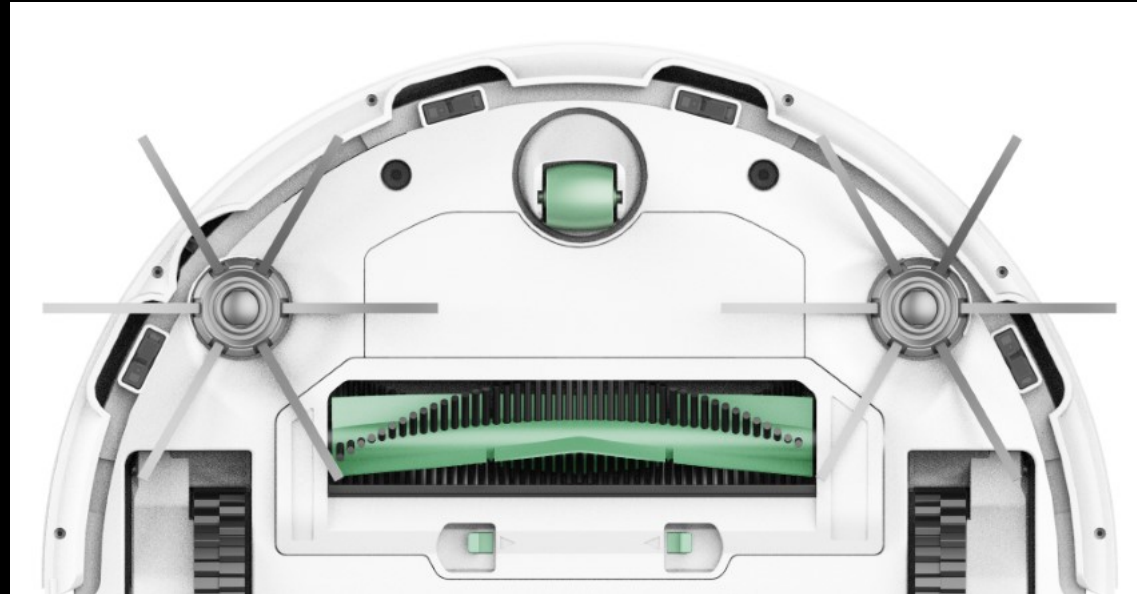

It learns from the first clean:

- Fine tune the path planning strategy to achieve better coverage & smarter path planning.
- Under the same full charged battery, it can clean more space than the first time.

# The powerful clean system

**Nidec** 2100Pa high suction

Two side brush + combo main brush

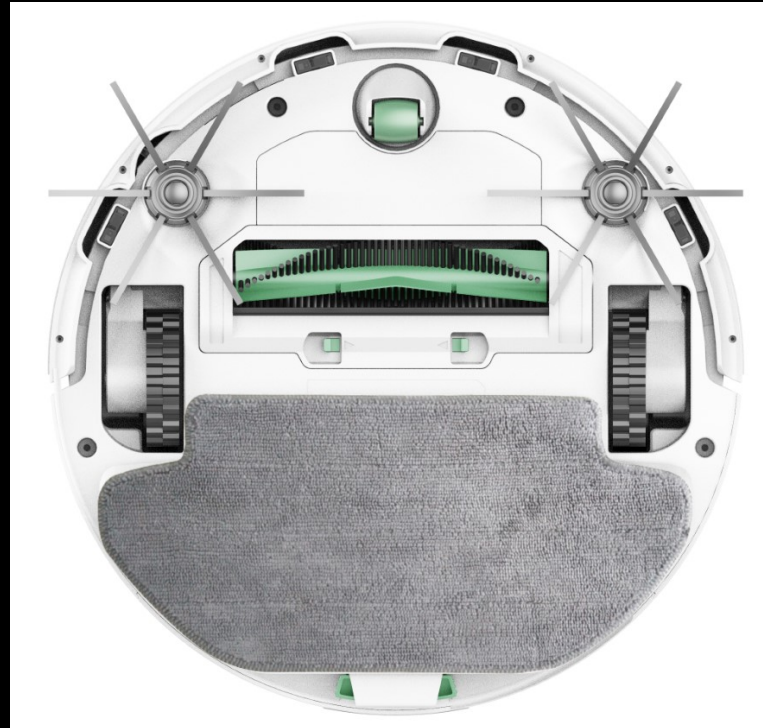

The powerful clean system to ensure clean capability.

- Up to 2100 Pa Nidec high suction module
- Dual-sided brushes design for wider range sweeping.
- Rubber & brush combo main brush.

# Clean + Smart Mopping

Dust bin & electric control water tank

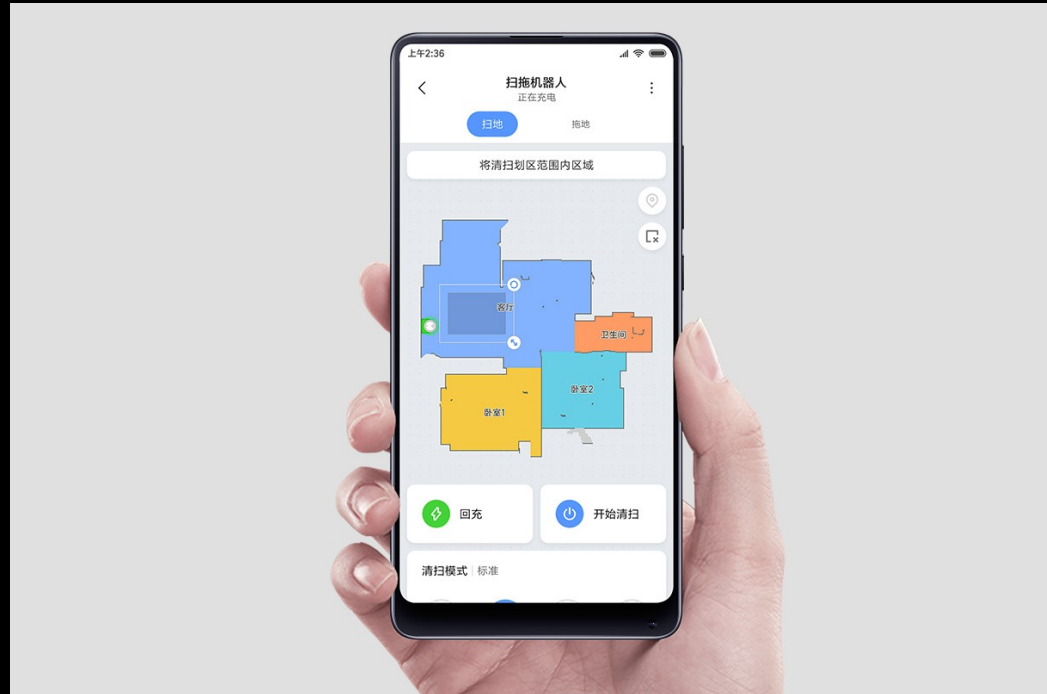

350cm<sup>2</sup> professional wet mopping cloth

Y Type mopping movement

1. Clean & mopping mode: cleaning & mopping at the same time which is suitable for several days one time floor clean.
2. Clean mode: Clean well for daily floor clean.
3. Mopping: Y type movement pattern learned from people, it makes mopping better.

# Easy MAP Editor

1. APP will create the rooms segmentation automatically at the first time clean
2. With the MAP editor tool, users can merge or split the rooms easily. It makes the clean task with more options and better efficiency.

# Over Obstacle capability

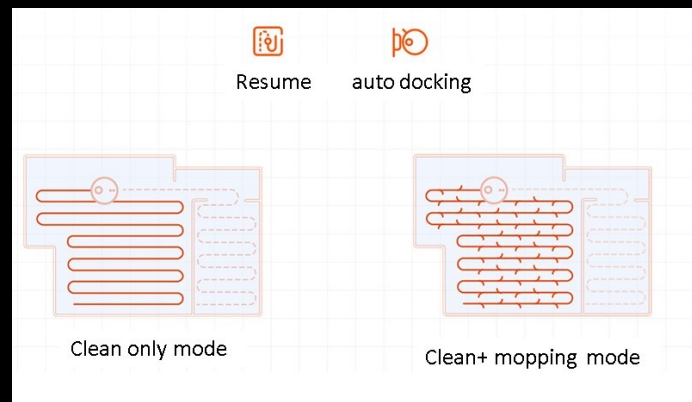

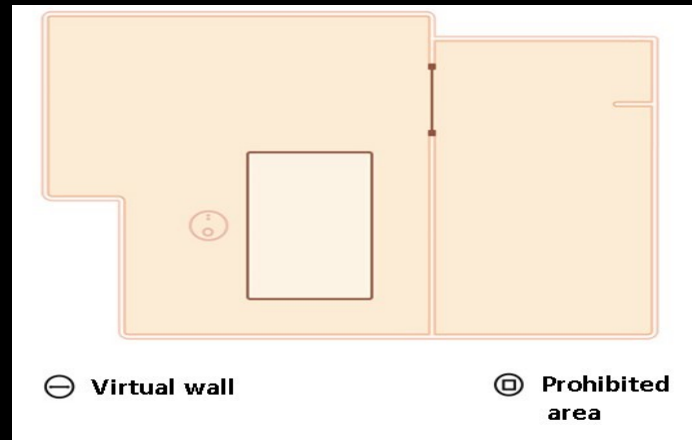

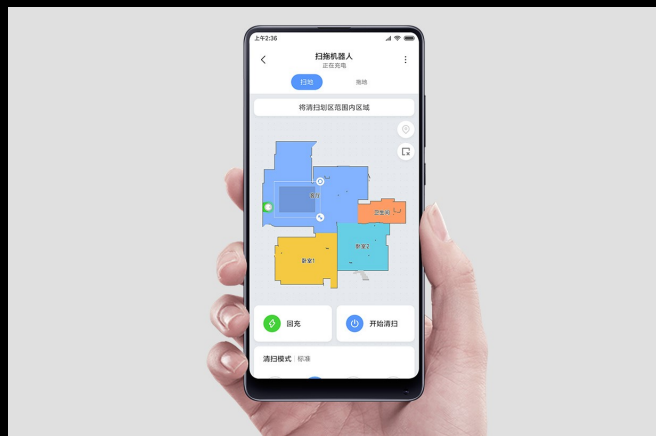

Over 18mm obstacle

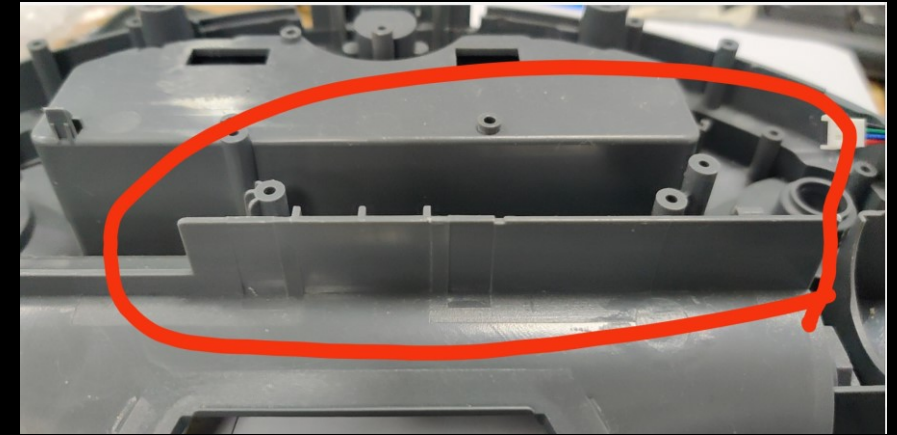

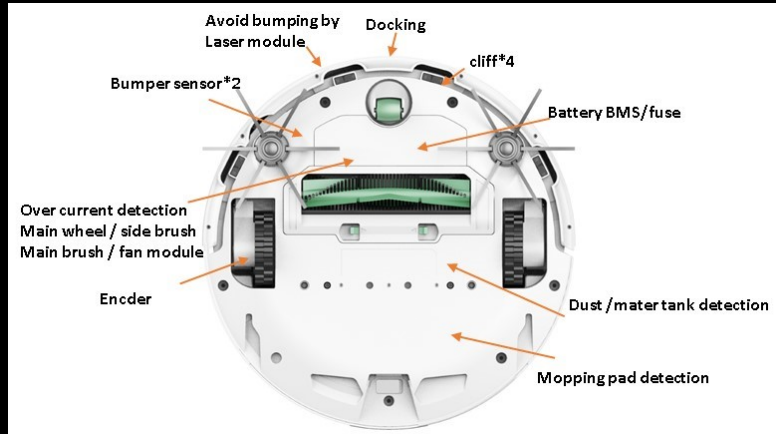

Note: Not the highest but the suitable is the most important

# Easy & Useful APP Remote Control

- 1. Support spot clean and area clean
- 2. Support virtual wall on map
- 3. Resume clean from re-charged, no clean area limitation.

# Much safer

1. Up to 12 sensors modules for safety.
2. Water proof design: main board coating and mechanic protection.
